

20th June 2018

Dear Parent

Just a reminder that the new River View App is ready for you to download now.

A link has been added on the bulletin board on our website for both Apple & Android phones/tablets or you can also just type in 'River View Primary' into the App Store search on your phone, download & sign in with the following:

Username – riverview

Password – parent

The first thing you must do is register & input your details and then each time you click on the app there will be no need to input the username & password. Please make sure you agree to receive push notifications and allow all location services to receive messages.

You can inform us of any new phone numbers, addresses, medical conditions & report an absence all via the app & the information will come straight through to the office to update. Messages will also be sent via the app. At the moment it only sends whole school messages but very soon we will be able to restrict it to groups & individuals. This will mean that in the near future we will no longer need the text message service, therefore we need all parents to sign up. Another good point is that our text messaging service only sends a text to the main number 1 contact, the app will send a push notification message to all signed up, so it could be for example Mum, Dad or Grandparent.

If you have any queries, please call into the school office.

Yours sincerely

Mr D Gauld
Head Teacher
